

**Moving Potential. Forward.**

You see beyond the clinical trial.  
Your ultimate goal is to give  
people a better quality of life  
and more opportunities to enjoy  
those special moments.

Novella Clinical is proud to be  
a part of your mission.

Our promise is to give your oncology program the individual attention it deserves.

**Helping You Improve Lives of People with Cancer.**

Our dedicated Oncology Business Unit (OBU) has the global experience, knowledgeable staff, and robust infrastructure to support you from Phase I through post-approval.

## Your Success is Our Dedication.

The unique complexities and challenges of oncology studies require extremely specialized and knowledgeable oversight to ensure success. Your commitment to developing new products to help patients fighting cancer is invaluable, and we want to be your partner in this valiant battle.

### Early to Mid-Phase Expertise.

Our extensive early to mid-phase expertise, accounting for 65% of our oncology franchise, enables us to guide your program through the complex and challenging intricacies inherent to early phase oncology studies. We understand firsthand the importance of monitoring safety data in first-in-man studies, and have the proven experience to support protocols requiring complex adaptations or multiple amendments. Our intimate Sponsor and site relationships, small teams with Phase I study expertise, and rapid data retrieval capabilities allow us to make well-informed decisions regarding dose escalation or multi-arm randomization/stratification to quickly and safely move your product through to the latter stages of development.

### Late-Phase Expertise.

With global oncology Phase IIb – III experience comprised of greater than 65 pivotal programs, coupled with our eClinical infrastructure capable of managing large data needs and an ISO 9001:2008 certification demonstrating our commitment to quality, Novella is a logical choice for your later phase oncology study. Novella has the capabilities to efficiently expedite and manage your global program as our staff and offices are located in North America, Russia and Eastern, Central and Western Europe, as well as our long-term partnerships with CROs in Asia, India and Latin America. Our medical and clinical staff include board-certified hematologists/oncologists, one of whom is our Chief Scientific Officer with more than 40 years of research and industry experience, available to help move your product's potential forward.

### The Experience to Reach Your Goals.

To date, we have supported more than 230 trials across multiple tumor types and protocol designs, treating nearly 35,000 patients at over 700 sites from a database of more than 12,000 investigators.

### Guiding You Every Step of the Way.

To help move your oncology product to market and into the hands of patients who need them most, we provide a full range of clinical trial services, from protocol design to FDA submission. Our team of medical, regulatory, operational and statistical oncology experts can help design and execute your study to ensure its success. At Novella, we provide the same level of commitment to each study including experienced staff, transparency in communications, knowledgeable project management, state-of-the-art data management, and expert data analysis.
