

Novella[®]
CLINICAL

Moving Potential. Forward.

You see beyond the clinical trial.
Your ultimate goal is to give
people a better quality of life
and more opportunities to enjoy
those special moments.

Novella Clinical is proud to be
a part of your mission.

Our promise is to give your clinical program the individual attention it deserves.

*“Just wanted to thank
you for really excellent
training ... the delivery,
pace and content of your
training was perfect.”*

– Senior Data Manger,
Midsize Biopharma
Company

Experienced eClinical training that understands “clinical” is the most important part.

Our eProcess Integration and Training department can ensure your
staff works smarter and your trial runs more efficiently.

We've trained over 12,000 clinical research professionals (from large
pharmaceutical to small biotech companies) and supported over
3,000 investigative sites (from New Jersey to Bangladesh to Ghana),
always focused on benefitting the study.

The Depth of our Experience.

- Supported Over 3,000 Sites
- Trained Over 12,000 Clinical Research Personnel
- Training on 6 Continents for Over 70 countries
- Trained Representatives from 8 Countries Speaking 7 Languages Simultaneously

The Mobile Classroom.

As a global, full-service CRO we understand how EDC software is used during the course of a study – from the perspective of site staff, CRAs, data managers and other team members. This enables us to tailor our EDC training to your specific process and workflow needs, whether that's conducting face-to-face sessions anywhere in the world, WebEx training or electronic investigator meetings.

Training From Both Perspectives.

As a leading EDC process and training partner, we can help you manage your transition from paper to EDC, including process reengineering, staff training, SOP development, working practice development and other support activities. Our trainers come from both the technical and clinical sides, which gives us a deep understanding of your unique requirements. That helps ease the transition to EDC as well as improve efficiency and the cross-functional nature of current EDC processes.

Unparalleled EDC Training.

The success of your trial depends on the quality of your training. We leverage our ten years of global training experience to empower CRAs with the knowledge and confidence to lead their site to success. A strong focus on process and technology in the clinical environment is both engaging and effective.

Our “Train the EDC Trainer” course enables CRAs to be certified to train personnel at their sites, as well as be more comfortable and proactive in addressing technical and clinical questions.

Maximize Your Staff.

Staff who are motivated and engaged greatly impact study success rates, and we can assist you in maximizing your staff's potential. Our Staff Development program provides the tools and training in areas of accountability, team functionality, trust building, leadership, customer service and communication. Employees will develop the skills to grow staff and be motivated personally.
